Contents of a Theme Package

A theme package includes the following:

- *(root folder)*
    - Layout template files (*.ascx)
    - Container files (*.ascx)
    - (Optional) Document Type XML file for individual layout templates or containers (*.doctype.xml)
    - (Optional) Custom attributes of tokens (skin.xml)
- **images** contains all image files used by the theme, including:
    - (Optional) Preview images of individual layout templates or containers (*.png/jpg/etc. with the same filename as your layout template or container)
- **css** contains all CSS required by layout templates and containers, including:
    - (Optional) CSS for individual layout templates or containers (*.css)
    - (Optional) CSS for the entire theme (skin.css)
- **fonts** contains all web fonts used by the theme.
- **js** contains all JScript files used by the theme, such as **bootstrap.min.js** and **common.js**.
- **menu** contains all desktop menu files for the theme.
- **mobmenu** contains all mobile menu files for the theme.
